

ROLL-UP DROP HARDWARE

For use on stages where adequate fly space is not available.

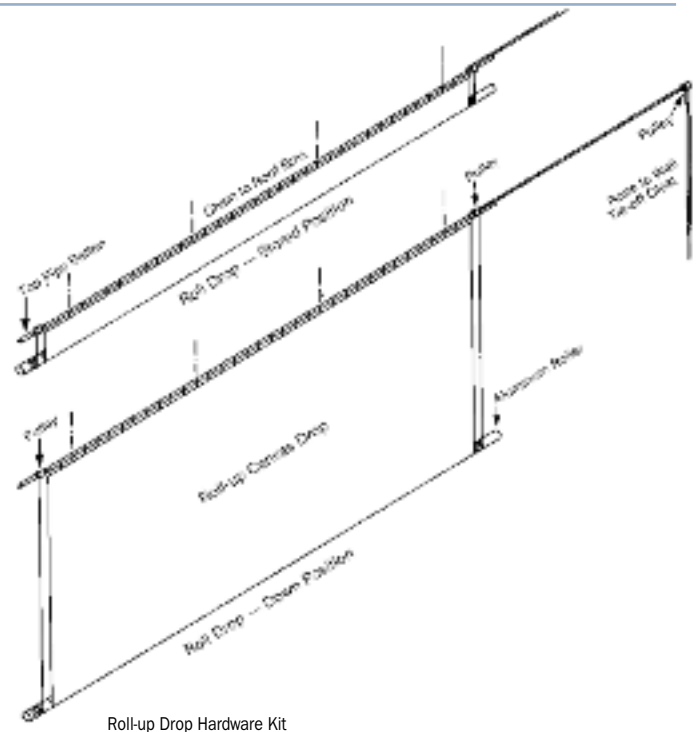

Your problem of raising and lowering drops due to lack of fly space is now solved. Roll-Up Drop Hardware accommodates drops up to 34 feet wide and 20 feet high (or 22 feet when you account for extra wrap in the tube. The hardware kit includes:

- 1 – 5" Diameter Aluminum Tube
- 1 – Tube Splice (if tube cannot be delivered in one section)
- 1 – Top Hanging Batten of 1-1/2" I.D. Schedule 40 Pipe with Splice
- 1 – Lot Pull Rope not less than 200 feet in length
- 2 – Pipe Mounted Pulleys (one single and one double)
- 1 – Wall Mounted Pulley (double)
- 1 – Tie-Off Wall Cleat

The price of the kit does not include hanging chain and related hardware or the roll drop itself. Prices for drops can be found on page 73.

Muslin and canvas drops work well with the hardware kit. *Note: This product is not intended to be used with Sharktooth Scrim. The center of the tube is supported by the fabric as it rolls up. Scrim is too stretchy and cannot adequately support the tube.*

When ordering drops, please add 2' to your drop height to wrap around the tube. Specify it as a "Roll Drop" and we will put a simple hem in the bottom instead of a bulky pipe pocket. The tube length should be 6' wider than the drop and cannot exceed 40' (use a 34'w drop in this instance).

Roll-up Drop Hardware Kit

PART #	DESCRIPTION	PRICE
80-45000	Roll-up Drop Assembly** (drop not included)	799.00
80-45005	Roll-up Drop Hardware Kit (includes instructions, live end pulley, dead end pulley, wall pulley, tie-off cleat, and 200 ft. of #8 sash cord)	195.00

DA-LITE ELECTRIC SCREENS

Da-Lite offers the world's widest selection of electric screens for the ultimate in convenience and professional presentations. No matter which model you choose, you will find Da-Lite's electric screens meet the needs of business meeting rooms, educational institutions, hospitality, and home theater applications.

DA-LITE FAST-FOLD PORTABLE SCREENS

Da-Lite's Fast-Fold Screens give professional presenters the edge on the road. Fast-Fold Screens and Portable Projection Stands take the rigors of constant set up and tear down, yet retain their good looks and performance for years.

DA-LITE MANUAL WALL AND CEILING SCREEN

Da-Lite's wide selection of manual wall and ceiling screens gives the presenter a professional solution for any projection application. All screens incorporate Da-Lite's exclusive Camlok roller system that prevents the screen from being pulled from the roller.

ROSCO REAR PROJECTION SCREEN

A range of projection screen materials, each with special technical properties, Rosco screens have been specified by major opera houses and theatres throughout the world. All Rosco screens are durable, washable, and inherently flame retardant. The screens' front surface is matted to minimize the unwanted effects of ambient light. Rosco screens are available by the yard or as custom-made screens with virtually invisible, ultrasonically welded edges and seams.
