## FLEX GLUE BY STAGE TECHNOLOGY

Stage Technology Flex Glue is a water based adhesive designed for use in many theatrical and scenery applications. It bonds to most materials including wood, fabric, and foam, and dries as a flexible adhesive that won't crack when bent or stressed. Use it to bond scenic materials, or as a thin film on troublesome materials that creates an easily painted surface.

A direct relationship with the manufacturer allows us to offer this product at a reduced cost. Our Flex Glue is widely used by professional scenic artists with great results.

## ROSCO ACRYLIC GLAZES

Rosco Clear Acrylic Glazes are versatile acrylic mediums that can be used to protect other painted finishes, provide additional strength and adhesion to other scenic paints, or to create transparent glazes and color washes. Use these clear acrylic mediums as a protective topcoat to a painted surface or mix directly into paint for additional binder strength. Available in either a flat matte or a gloss finish.

## PREMIERE CLEAR

These variety water-based urethanes are very versatile and durable for a variety of project needs. They are ideal for use over painted scenery and faux finishes as well as textures and cracked surfaces. They dry to a clear, long-lasting film with exceptional hardness, durability and abrasion resistance. This virtually odorless clear is water thinned and suitable for faux finish glazing techniques.

## ROSCO FOAMCOAT

Foamcoat is a non-toxic, water based coating that provides a hard, damage resistant finish, yet can be sanded, or carved to add detailing. Foamcoat can be used on a wide variety of surfaces including foam, primed wood, concrete block, primed fiberglass, papier mâché, muslin and more. Foamcoat is compatible with all Rosco paints. Foamcoat is inherently flame retardant and water resistant.

## ROSCO FLEXCOAT

Rosco Flexcoat is a non-toxic, water based coating for use as a flexible protective layer over all types of foam. It is especially useful on foam scenery and props which undergo excessive handling. A 100% acrylic formula provides excellent adhesion and contains no plasticizers, so it will not become brittle with age.

## ROSCO CRYSTALGEL

CrystalGel is a non-toxic, water-based material which provides a clear, plastic-like coating on virtually any surface used in modern stagecraft. It air dries quickly – usually within hours – to a flexible, translucent surface. CrystalGel is a styrene resin, providing the greatest adhesion power of any non-oil base product. When dry, it can be painted with any Rosco scenic paint, or carved, or safely rolled without cracking, peeling or sticking. Such products as sand, sawdust or powdered clay can be added to it to create unique textures.

## ROSCO FLEXBOND

Rosco Flexbond provides a flexible adhesive bond between scenic materials, such as fabrics, plastics, foams and wood. Flexbond dries to a clear, hard, yet pliable coating that does not suffer cracks or breaks when flexed. The adhesive bond of Flexbond remains truly pliable even as the materials bend and deform. Flexbond is water based, and very safe to use, with little fume and low toxicity.

## SCULPT OR COAT

Sculpt or Coat creates a protective tough coating that stops breakage, keeps pieces from drying out and prevents solvent based paints and spray paints from eating away foam. Can be used on polystyrene scenery, props, glass, and ceramics or foam rubber puppets, masks, costume, and makeup pieces.

## ROSCMDLAMEX FIRE RETARDANTS

Rosco offers a full range of Fire Retardants for virtually every scenic need. Each product can be easily applied with a roller, brush, sprayer, or direct immersion.

## ROSCO METALLIC PAINTS

Rosco's Off Broadway vinyl acrylic Metallic Colors may be used on a wide variety of scenic materials including hard scenery, foam scenery, drops, and ground cloths. It is ready to use right out of the bucket or may be diluted to stretch your paint budget.

\*Painting Metallic Colors onto flame-retardant fabrics may cause the paint to tarnish and discolor. Test a small area of paint before painting entire drop.

## ROSCO FLUORESCENT PAINTS

Available in 9 brighter than normal colors which fluoresce vividly under ultraviolet lights, Rosco Fluorescent paints can create a wide range of exciting effects. They can be used to create special effects using ultraviolet Blacklight or combined with other Rosco paints to make normal colors more vibrant. Fluorescents use the same high quality, water base, vinyl acrylic binder found in Off Broadway paints. It is suitable for use on most surfaces and for interior and exterior\* applications. Try using Rosco Fluorescent paints when matching the brightest colors in the Pantone Color Matching System or to achieve astounding 3-D effects.
